Conclusions

04

Next Steps

Business Problem

1. Was the increase in stolen bases from 2022 to 2023 *significant*?
2. What contributes to a high number of *stolen bases*?

Summary

Significant
increase of SB
from 2022 to
2023

Increase SB
attempts and
expect an
increase in CS

Outline

Business Problem

02

Data & Methods

03

Conclusions

04

Next Steps

Data & Methods

- Data gathered from Baseball Savant
- 130 players from the 2022 season & 133 players from the 2023 season
- Stats include:
 - CS: Caught Stealing
 - SB: Stolen Base
 - Bolts
 - Sprint Speed

Data & Methods

- 2 sample t-test to evaluate SB from 2022 to 2023
- Relationship between SB and the following factors:
 - CS
 - Sprint Speed
 - Bolt

Outline

01

Business Problem

02

Data & Methods

03

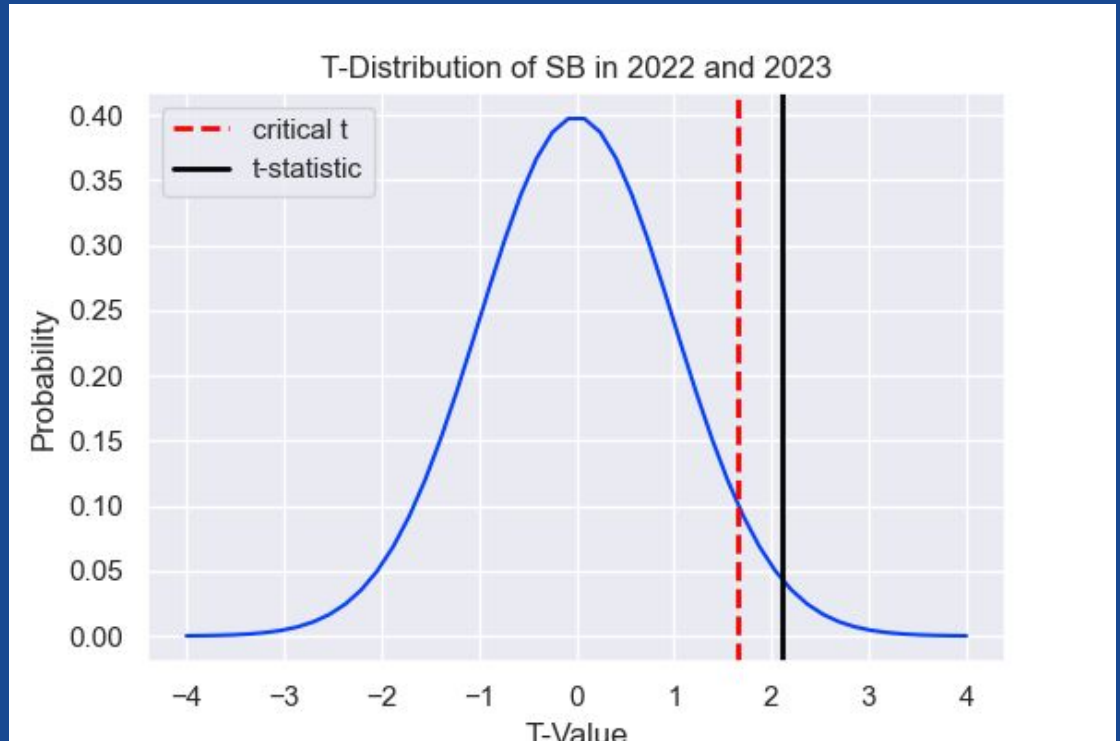

Conclusions

04

Next Steps

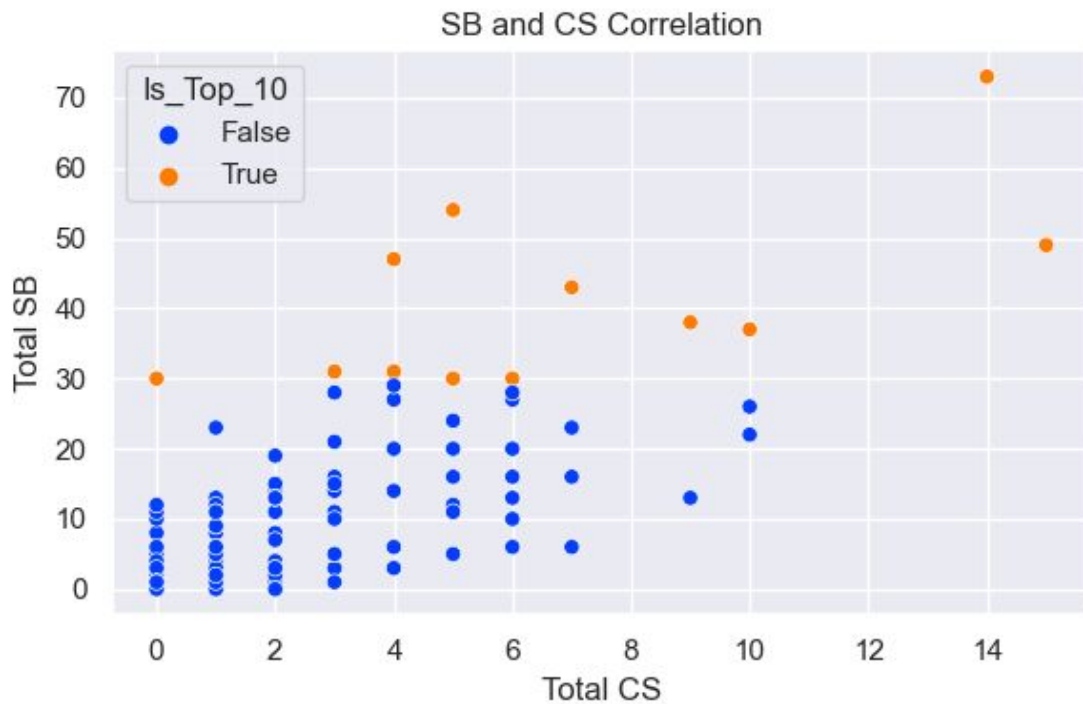

Results

- Significant increase in SB from 2022 to 2023
- alpha value of 5%
p-value ≈ 0.035
- t-statistic ≈ 2.1
critical t-value of 1.65

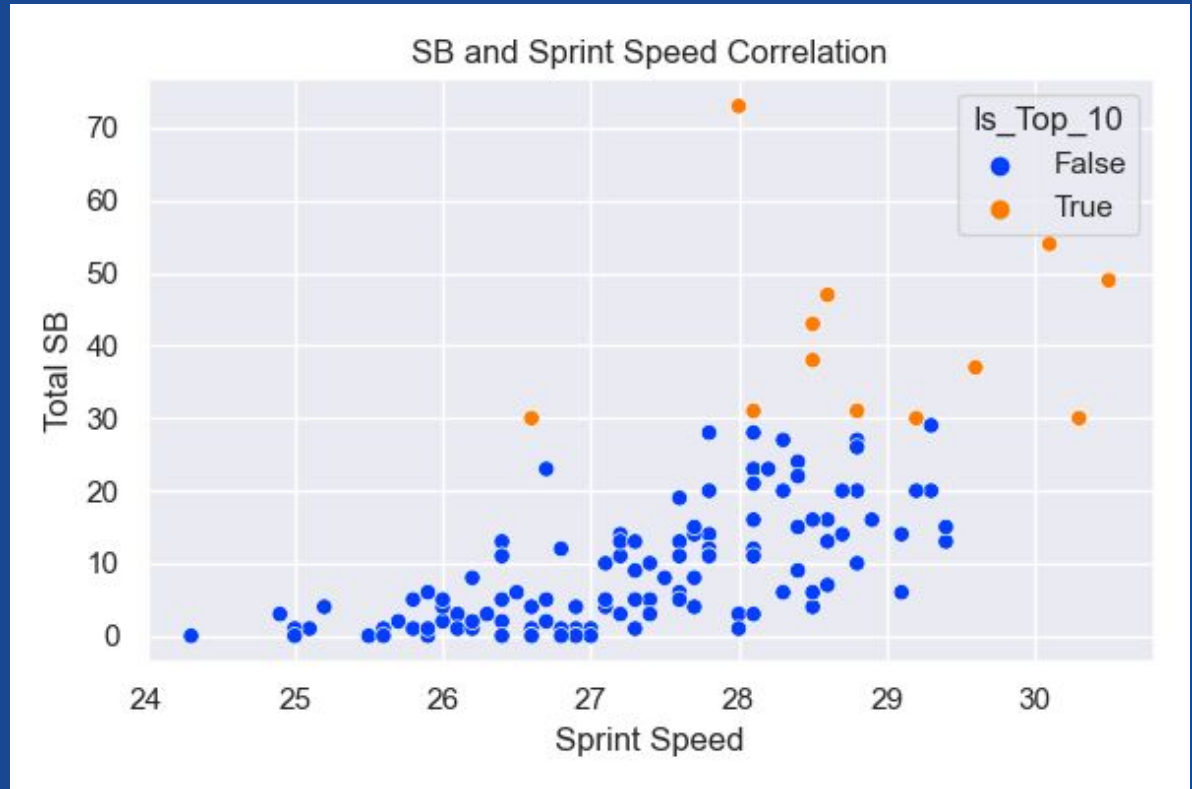

**Strong correlation
between SB and CS: 0.72**

Results

Moderate correlation
between Sprint Speed
and CS: 0.65

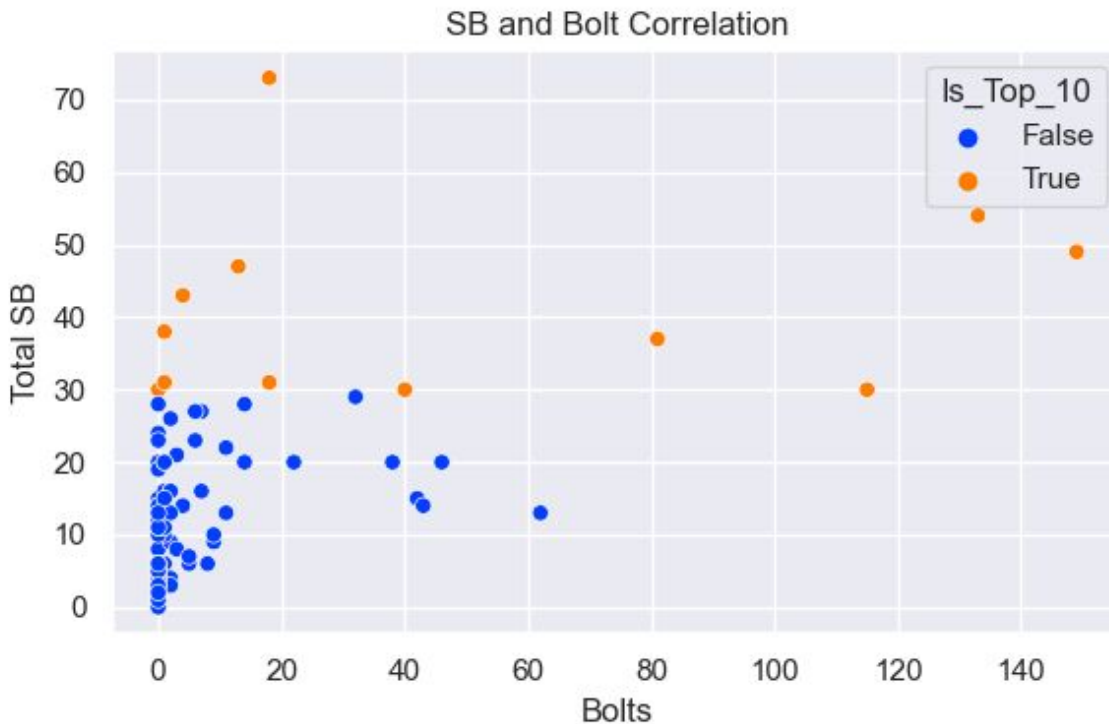

Results

Moderate correlation
between SB and Bolt:
0.54

→ Outliers could be
forcing a correlation

Recommendations

1. Proceed with our plan to increase SB
2. Increase SB attempts: Players focused on increasing SB must be willing to sacrifice CS

Outline

01

Business Problem

02

Data & Methods

03

Conclusions

04

Next Steps

Next Steps

- Repeat this analysis with a **larger dataset**:
 - Observe SB over all years
 - Compare stats of players with top SB over all years
- How does SB, CS and SB% effect the number of **team wins**?

Thank You
